The University of Utah Asia Campus is now accepting applications for their Master of Public Health (MPH) program. The highly ranked University of Utah is extending its world-class education around the globe and the new Asia campus provides a unique international opportunity to study both in Korea and the USA to earn your MPH. You will spend the first year at the Incheon, South Korea Campus, which is taught in English by our U.S. faculty. The second year then involves study at the Utah Campus in the U.S., allowing you to have an unprecedented global experience at a program in the United States. U.S. News & World Report ranked the University of Utah, Master in Public Health, in the top 10 Public Health Programs among Peer Programs. A degree from our CEPH accredited University of Utah Asia Campus will provide immediate recognition from the academic public health community.

The MPH program will require a minimum of 45 credit hours of coursework. The required classes represent the five key disciplines for all students educated in Public Health, as directed by the Council on Education in Public Health (Biostatistics, Epidemiology, Environmental Health Science, Health Policy and Management, and Social and Behavioral Sciences), as well as skills in the core areas of public health assessment and research, program development, and program evaluation. The courses utilize experiential learning with group projects providing opportunities to learn practical skills and develop leadership qualities. The core curriculum (24 credit hours) is augmented by electives tailored to each student's professional goals (15 credit hours). A required practicum (internship, 6 credit hours) provides the opportunity for the student to gain real-world experience with an organization conducting public health activities.
Why Earn a Masters in Public Health?

The Master in Public Health degree stresses the qualities of leadership, effective management, and teamwork that can be applied to the many public health challenges facing our world. Those earning a MPH open opportunities of serving and improving the health of people across the globe. During your time in the MPH program, you will have many opportunities to gain international experiences, with our programs in Korea, Ghana, India, Peru, China and Armenia. The international experiences provide unique venues to expand your world-view and learn new ways of delivering health services. The knowledge, understanding and respect gained from working alongside people of different traditions and beliefs will prepare you to work in many different settings and organizations.

Apply Now!

The need for well-trained public health professionals is increasing, and the demands for internationally trained public health professionals are being driven by the world-wide transformation of healthcare systems. The MPH program is designed to prepare both new and experienced healthcare professionals to meet the critical healthcare needs of the world’s nations. A degree in Public Health from the University of Utah Asia Campus will give you the tools and experience you need to help lead these efforts.

**INTERESTING FACT:** For the past several years, the U.S. News & World Report had ranked our Public Health Program in the top 10 among peer public health programs.
